Answers

1. C- route
2. B.- medium
3. A.- perceptions
4. D.- illustrate
5. B.- accessible

convention, demonstration, display, exhibits, media, visual

At the city art fair, there were exhibits of paintings, sculpture, and children's book illustrations by local artists. In addition, a stained glass artist offered a demonstration, working on a stained glass window so people could see the process. Almost all the visual arts were on display. This exhibition was held in the city's new convention center so more people could attend. All the local media-- the local TV channel, both newspapers, and the public radio station-- reported on the art fair.

options, perspective, psychology, survey, trace, transformation

This course will be a survey of American literature. It will trace the development of a distinctly American perspective or viewpoint from the Puritans to the 21st century. The course will consider the psychology of writing, and the topics American authors have treated as most appropriate. It will also consider the transformation of American attitudes toward literature in the last century, and the effects of more entertainment options on public reading habits.

access, complexities, equipment, export, granted, percentage, qualitative, route, technical, volume

Companies that produce large medical equipment like X-ray or MRI machines need access to the latest technical advances. They also need managers who care about qualitative evaluation and controls, and are not just concerned about the volume of machinery they can sell. If they export a large percentage of their production to other countries, they also need an understanding of the complexities of different health care systems in those countries. The route to success in such an industry is careful attention to detail in every aspect of production, inspection, and shipping. Their motto should be, "Don't take any procedure for granted. Check everything twice!"
